

GUZALA TELLS HER STORY

The following testimonials are all from parents that have used Dr. Aron to treat their children. Many of these individuals had tried multiple specialists without success for years. Dr. Aron was able to restore the skin and give the children almost instant and permanent relief from itching and severe eczema. If you wish to correspond with any of these parents and ask questions, they can be found on Dr. Aron's Facebook Discussion Group.

My daughter suffered from eczema since she was 6 weeks old. We went through so much as everyone with a child with eczema knows. We tried diets, different meds, different countries etc and her eczema was still uncontrollable. Most gps/hospitals would say "she has the worst type of eczema we have seen". When she was four/five her eczema seemed more controlled. My daughter looked a lot better. Then all of a sudden she started losing weight. The infections started all over. She seemed allergic to everything and anything. When she turned six she had one of her worst flares. The increase in steroids over the years started to scare me. Her skin was very red and angry. I googled red skin and worsening eczema. A lot of the tsw sites came up. I thought "this is my daughter". I took her off all steroids. Her skin was red and becoming redder by the day. Her skin was weepy and she had more pustles (she was on antibiotics for over a year and still the infections where not clearing). She had mrsa,mssa,pvl staph and was picking up more infections.

I found out about Dr aron but I thought he was some kind of scam or too good to be true. A lot of mums on Facebook were talking of his treatment and how it saved their children but I felt we could not start with the steroids (we had no medical diagnosis – it was all me reading up). The dermatologists and the derm nurses thought I was crazy and told me tsw was happening but was very very rare. I joined most tsw groups and got alot of support from the mums. Things where just not getting better and on the groups, a lot of mums where praising Dr Aron and their children where healing. It was quite a confusing time for us.

For under a year I put my daughter through tsw but finally we had enough. She was suffering mentally physically in all aspects of her life. She had no joy to play and she was missing school. She became angry and frustrated. She was having

GUZALA TELLS HER STORY

problems with her emotions. June 2014, we started treatment with Dr Aron and my daughters life has changed for the better. She hardly misses school. She is happy. She laughs, sings and dances like any other seven year old. I do feel guilty for taking that year away from her and depriving her of so much. I wish I had started Dr Aron's treatment sooner.

For the first time in seven years she has not had a infection. She sleeps through the night. She has gained so much confidence. She wears clothes she never could before. I could go on and on.....

Tsw does exist but is very very rare and to put a child through it is such a big step. Really think before you make such a bold move as there is another option.
