

REBECCA FENBY TELLS HER STORY

The following testimonials are all from parents that have used Dr. Aron to treat their children. Many of these individuals had tried multiple specialists without success for years. Dr. Aron was able to restore the skin and give the children almost instant and permanent relief from itching and severe eczema. If you wish to correspond with any of these parents and ask questions, they can be found on Dr. Aron's Facebook Discussion Group.

Iris: Age at start of treatment: 4 year 8 months. Iris had mild eczema in her joints as a baby. This slowly spread to other areas including across her collarbone, down both arms, and across her lower back and buttocks. With every increase in potent steroid and every attempt to 'step down' applications, it rebounded worse than ever and often in new places. We finally engaged Dr. Aron, and within days of starting the treatment, her skin had become more smooth and supple and the itch was gone. Within a month, you could barely see where she had ever had eczema. She has gone from strength to strength since, and is now on a very minimal maintenance treatment over the winter: one app every five days. Her skin is perfect.

Bea was about 20 months when she started the treatment. She was diagnosed by our GP with eczema at 8 months of age and was quickly bumped up the steroids and emollients until her treatment regime mirrored her sister's, who is three years older and has a completely different spread of eczema. Bea was covered neck to ankle. Like her sister, whenever we tried to step down steroid applications, she would flare worse than ever. Finally, we stopped the steroids altogether while I searched for a solution. During the two weeks between stopping steroids and finding Dr. Aron, she could not sleep for more than two hours at a time, day or night. She scratched constantly. It was a nightmare. On the second day after starting the creams, she slept for four hours in one go. Six hours the next night. All night long by the fourth day. She has also gone from strength to strength, and while she is more prone to flares than her sister, what with being more immature physically and more prone to viruses, the flares calm quickly, and she too is already on a low maintenance regime of one application of cream every three days. Dr. Aron has transformed their skin and their lives. We will never stop being grateful that we found him.
